# Cosmetic

## Dentistry

With cosmetic dentistry many things are possible today that were not possible just a few years ago. Utilizing the latest dental technology for materials and procedures Dr. Saeid Mohtashami is able to achieve what is often referred to as "Instant Orthodontics". What used to take years can be accomplished in several visits and a few weeks. Through a combination of implants, metal-free fillings, metal-free crowns and porcelain veneers, you too can have the smile you've always wanted. Many times these complete Smile Makeovers can be completed in just two visits! Truly, stained teeth can be whitened, crooked teeth straightened, broken and chipped teeth repaired and missing teeth replaced. What used to take years is now done in just a few visits: with amazing quality.

# Dental Implants

## Teeth-in-an-Hour™

Teeth-in-an-Hour™ is a new dental implant surgery system that streamlines the treatment process and provides the patient with permanent teeth in record time. The system incorporates the magic of CT Scans and 3-D imaging software to accurately assess bone structure, map out the areas of best integrity, and create a permanent prosthesis prior to surgery. This revolutionary system offers a more accurate and safer positioning of dental implants and provides the patient with permanent teeth in about an hour.

- No Temporaries
- Greatly Reduced Healing Time
- No Significant Pain or Swelling
